

תרגול לדוגמא של ניסוח מחדש:

איך למקסם את הסיכויים להצליח באמירנט

1. תרגול חלק א' - קל יותר (היכרות עם הסגנון שאלות)
2. תרגול חלק ב' - בינוני
3. תרגול חלק ג' - רמה כמו של הבחינה האמיתית
4. מפתח תשובות לקטעים השונים

Question 1:

Despite the heavy rain, the event proceeded as planned.

- A) The event was postponed because of the downpour.
- B) The event continued even though it was raining heavily.
- C) The organizers decided to reschedule due to bad weather.
- D) The rain forced the event to be canceled.

Question 2:

The manager insisted that all reports be submitted before the deadline.

- A) The manager expected some of the reports to be handed in on time.
- B) The manager refused to accept reports before the deadline.
- C) The reports were not allowed to be submitted after the deadline.
- D) All reports were to be submitted after the deadline.

Question 3:

If she studies more, she might pass the exam.

- A) She must pass the exam and therefore she will study more.
- B) She can pass the exam even if she doesn't study a lot.
- C) She may pass the exam if she studies more.
- D) She might fail even if she studies a lot.

Question 4:

The Titanic sank in 1912 after hitting an iceberg during its maiden voyage.

- A) The Titanic successfully completed its first journey in 1912.
- B) The Titanic sank on its first trip after colliding with an iceberg.
- C) The Titanic sank due to an onboard fire in 1912.
- D) The Titanic was never completed and never set sail.

Question 5:

The Wright brothers made the first powered flight in 1903.

- A) The Wright brothers were the first to design an aircraft, but it never flew.
- B) The Wright brothers successfully flew a powered airplane for the first time in 1903.
- C) Airplanes were already in common use by 1903.
- D) The Wright brothers' airplane was unable to take off.

Question 6:

The Great Depression began after the stock market crash of 1929.

- A) The Great Depression was triggered by the collapse of the stock market in 1929.
- B) The Great Depression occurred due to a war between major nations.
- C) The stock market crash of 1929 had no effect on the economy.
- D) The Great Depression was a brief financial crisis that lasted only a few months beginning in 1929.

Question 7:

The Berlin Wall fell in 1989, marking the end of the Cold War era.

- A) The Cold War officially started with the fall of the Berlin Wall in 1989.
- B) The Berlin Wall remained intact throughout the 20th century.
- C) The destruction of the Berlin Wall in 1989 symbolized the ending of the Cold War period.
- D) The Berlin Wall was built in 1989 to divide East and West Germany.

Question 8:

The Declaration of Independence was signed in 1776, establishing the United States as an independent nation.

- A) The Declaration of Independence was signed in 1776, officially separating the U.S. from other countries.
- B) The United States joined other countries in 1776 and gave them independence.
- C) The Declaration of Independence was signed to strengthen control over the U.S.
- D) The U.S. refused to sign the Declaration of Independence in 1776 and therefore became independent only later.

Question 9:

In 1969, Neil Armstrong became the first person to walk on the moon.

- A) The moon landing was accomplished second in 1969 by Neil Armstrong.
- B) Neil Armstrong was the last astronaut to set foot on the moon.
- C) Neil Armstrong walked on the moon in 1969, becoming the first human to do so.
- D) Neil Armstrong was the first person to attempt to fly to the moon.

Question 10:

If it hadn't been for her advice, I wouldn't have made the right decision.

- A) I made the wrong decision despite her advice.
- B) I was able to make the right choice thanks to her guidance.
- C) She gave me bad advice, so I made a poor decision.
- D) I didn't listen to her advice and made the wrong choice.

Question 11:

His performance was nothing short of spectacular and the public cheered him.

- A) His performance was fairly average but the audience loved it.
- B) His performance was absolutely outstanding and therefore the public cheered him.
- C) His performance was disappointing and therefore the public disrespected him.
- D) His performance was below expectations but people cheered him nonetheless.

Question 12:

The new policy aims to mitigate the effects of climate change and will come into effect in 2030.

- A) The new policy seeks to reduce the impact of climate change and will begin in 2030.
- B) The new policy is designed to make climate change worse and will come into effect before 2030.
- C) The new policy will begin in 2030, and it's goal is to change the environment.
- D) The new policy increases the risks of climate change but will only come into effect in 2030.

Question 1:

The scientist's discovery was met with skepticism by fellow scientists and therefore it was only known years later.

- A) Everyone was thrilled by the scientist's discovery and therefore he became known.
- B) The scientist's discovery was only well known long after, due to other scientist's doubt about it.
- C) The scientist's work was instantly accepted as truth by his peers but despite this was only known years later.
- D) The scientist's discovery was ignored by the public and never became well known.

Question 2:

The teacher encouraged students to participate in the discussion in order to improve their speaking abilities.

- A) The teacher forced students to speak during the lesson to practice their speech abilities.
- B) The students weren't required to take part in the debate despite their lack of speaking abilities.
- C) To enhance their articulation, the teacher motivated students to join the conversation.
- D) The discussion was canceled due to lack of interest of the students.

Question 3:

The company's profits plummeted last quarter due to most imports being cancelled.

- A) The company made significantly more money last quarter because of increased imports.
- B) The company's earnings dropped sharply in the last quarter due to the cancellation of most imports.
- C) The company's profits remained stable throughout the year despite the imports being cancelled.
- D) The company saw gradual financial improvement because of the cancellation of the imports.

Question 4:

The athlete was disqualified due to a breach of the rules and therefore was also kicked off the team.

- A) The athlete won the competition fairly and was promoted to the national team.
- B) The athlete was removed from the competition for breaking the rules and also was taken off the team.
- C) The athlete was allowed to compete despite some mistakes and his team forgave him.
- D) The athlete refused to follow the rules but was still eligible because his team supported him.

Question 5:

All stars, except for the sun, look like a tiny point of light because they are so far from earth.

- A) All stars, including the sun, look like small dots of light due to their distance from earth.
- B) Some stars are so far from the sun that they look only like a tiny point of light.
- C) Compared to the sun, stars are very far from earth and therefore seem like just little points of light.
- D) Because they aren't close to earth, all stars apart from the sun appear as only tiny dots of light.

Question 6:

The CEO was taken down from his position after a decade in charge due to tax evasion.

- A) The CEO voluntarily gave up his role after ten years because he broke the law.
- B) The CEO was fired after ten years in office in light of his tax evasion.
- C) The CEO was forced to leave his position unwillingly because he was a bad at his job.
- D) Due to tax evasion, the CEO needed to stay at his position after a decade.

Question 7:

The French Revolution led to the overthrow of the monarchy in 1789.

- A) The French monarchy gained more power as a result of the French Revolution.
- B) The French Revolution in 1789 resulted in the removal of the monarchy.
- C) The French Revolution was a peaceful transition of power in 1789.
- D) The French monarchy was never abolished.

Question 8:

World War I ended in 1918 with the signing of the Treaty of Versailles.

- A) World War I ended in 1918 after the Treaty of Versailles was signed.
- B) World War I continued for many years after 1918 due to the Treaty of Versailles.
- C) The Treaty of Versailles started World War I in 1918.
- D) World War I ended in 1918 because they didn't sign the Treaty of Versailles.

Question 9:

The Black Death killed millions of people in Europe during the 14th century.

- A) The Black Death devastated Europe in the 14th century, killing millions.
- B) The Black Death was a minor disease with little impact on Europe.
- C) The Black Death only affected Europe, and ended up killing millions.
- D) The Black Death was a deadly illness around the world in the 14th century.

Question 10:

The United Nations was founded in 1945 to promote international peace and cooperation.

- A) The United Nations was established in 1945 to encourage global unity and prevent conflicts.
- B) The United Nations was created during World War I to continue global cooperation.
- C) The United Nations is a military alliance formed to conquer other nations and was founded in 1945.
- D) The United Nations was formed after 1945 in order to encourage more cooperation between countries.

Question 11:

The Industrial Revolution began in Britain in the late 18th century, transforming manufacturing processes.

- A) In the late 18th century, a change began in Britain in production methods with the Industrial Revolution.
- B) The Industrial Revolution led to the decline of factory work in the early 18th century in Britain.
- C) The Industrial Revolution began in the 18th century and effected many countries including Britain.
- D) Britain was transformed by the Industrial Revolution in the late 18th century in many areas, except for production processes.

Question 12:

The assassination of Archduke Franz Ferdinand in 1914 triggered the start of World War I.

- A) World War I started long before the assassination of Franz Ferdinand.
- B) The assassination of Archduke Franz Ferdinand in 1914 was a key event that led to World War I.
- C) The assassination of Archduke Franz Ferdinand was the only reason for World War I.
- D) The assassination of Franz Ferdinand happened during 1914 as a result of World War I.

Question 1:

Rapid advancements in artificial intelligence technologies, particularly in automation and machine learning, have sparked widespread apprehension about the long-term implications for human employment, especially in sectors reliant on routine cognitive and manual tasks.

- A) The rise of artificial intelligence has created new job opportunities, especially in areas that depend on repetitive tasks and therefore it has sparked widespread anticipation about the future of human employment.
- B) The increasing sophistication of AI, especially in automating predictable tasks, has led to growing concerns over job displacement in several industries.
- C) Developments in AI have had minimal impact on job stability, even in industries dominated by routine labor, nevertheless there has been widespread apprehension about the long term consequences for human employment.
- D) Concerns about artificial intelligence are mostly unfounded, as its influence is limited to highly technical professions.

Question 2:

Although the policy had initially been praised for its innovation, subsequent evaluations over the next decade revealed unintended consequences that overshadowed its early successes.

- A) The policy was well-received at first, but within ten years, it became clear that its negative effects outweighed the benefits.
- B) After being criticized in its early stages, the policy eventually became known for its innovation after a decade of revelations.
- C) Despite being overlooked initially, the policy's advantages became more obvious over time and overshadowed previous ones.
- D) Over the past decade, the policy has become a model of success due to its innovation, although it was overshadowed by other innovations in its early stages.

Question 3:

Even though digital platforms were once hailed as revolutionary tools for enhancing public discourse, recent years have seen a growing recognition of their role in spreading misinformation and deepening ideological divides.

- A) Although misinformation existed before digital platforms, they are now enhanced due to digital platforms.
- B) Public discourse has increased by the rise of digital platforms in recent years and we can now see the revolutionary benefits from this.
- C) Digital platforms have increasingly been criticized for contributing to the spread of false information and societal polarization, even though they were originally celebrated for improving communication.
- D) Digital platforms were created only to enhance public discourse, but they failed to do so leading to a growing recognition of their role in spreading misinformation and enlarging ideological divides.

Question 4:

Despite ongoing efforts to reduce greenhouse gas emissions over the past two decades, global temperatures have continued to rise, prompting scientists to question the effectiveness of current environmental policies.

- A) Because of rising temperatures, scientists have begun to try to reduce greenhouse gas emissions over the past two decades and most scientists have been questioning the efficacy of current environmental strategies.
- B) Over the last twenty years, attempts to cut emissions have not halted the rise in global temperatures, leading experts to doubt present strategies.
- C) Recent policies have successfully reversed global warming trends, especially in the last two decades.
- D) Although scientists questioned emissions policies in the past, temperature levels have recently stabilized thanks to the reduction of greenhouse gas emissions over the past twenty years.

Question 5:

The volcano erupted suddenly and without warning, causing widespread panic and forcing thousands of residents to evacuate their homes within just a few hours.

- A) The abrupt eruption of the volcano triggered immediate panic throughout the region, and within a short period of time, thousands had already fled their homes.
- B) After several days of early warnings, residents calmly evacuated the area before the volcano erupted thus saving their lives.
- C) The volcano was expected to erupt, but despite the widespread panic, residents didn't evacuate their homes.
- D) Due to an unexpected volcano eruption, residents panicked and most evacuated their homes within just a few hours.

Question 6:

Scientists have continued to monitor the glacier on a daily basis since 2018, as its accelerated melting poses a growing risk to surrounding communities and fragile ecosystems.

- A) The glacier was last observed in 2018 and therefore it's melting has accelerated which poses a risk to near communities and sensitive ecosystems.
- B) Ongoing scientific observation of the glacier, which began in 2018, is due to the increasing threat its rapid melting presents to both local populations and vulnerable environmental systems.
- C) Although the glacier has shown signs of melting, scientists have concluded that it is not a cause for concern although they will continue to monitor it on a daily basis.
- D) Researchers have been monitoring the glacier regularly since 2018, and although it's melting rate has increased, it doesn't seem as a risk to surrounding communities or sensitive ecosystems.

Question 7:

Every summer, tens of thousands of tourists visit the ancient city to explore its centuries-old monuments, admire its architecture, and engage with its rich cultural heritage.

- A) Tourists visit ancient cities to look at the architecture and engage with their rich cultural heritage annually.
- B) Visitors are drawn to the old city in the summer because it's the only season they can explore its centuries-old monuments, admire the architecture and get to know the rich past culture.
- C) Each summer season, large numbers of visitors travel to the historic city to experience its cultural legacy, tour well-preserved landmarks, and appreciate its architectural beauty.
- D) The ancient city is visited by the most tourists each year due to its cultural legacy, well preserved landmarks and architectural beauty.

Question 8:

By the time most residents of Pompeii realized the severity of the volcanic eruption, it was too late to escape, and the city was soon buried under a thick layer of ash and pumice.

- A) Most of the residents of Pompeii, upon recognizing the volcano's imminent danger, had no viable way to flee before the city was enveloped in volcanic debris.
- B) Early warnings allowed most inhabitants of Pompeii to evacuate well before ash and pumice began to fall in the city and therefore most survived.
- C) Although the eruption was severe, only a small portion of the city was affected by the ash cloud and buried under a thick layer of ash and pumice.
- D) The eruption occurred quickly, therefore some residents of Pompeii didn't realize the eruption and couldn't escape in time before the city was buried under ashes.

Question 9:

After months of global research and clinical trials, several COVID-19 vaccines were approved and distributed, marking a turning point in the fight against the pandemic.

- A) The release of COVID-19 vaccines happened towards the end of COVID-19 and therefore helped only a limited amount of the population fight against the pandemic.
- B) Despite rapid vaccine approval, most countries waited months before beginning distribution to the public, which finally helped fight against the pandemic.
- C) The authorization and rollout of COVID-19 vaccines, following extended scientific efforts, represented a pivotal phase in managing the global health crisis.
- D) Vaccines were developed only after the pandemic had largely ended, limiting their impact on global infection rates of COVID-19.

Question 10:

Once Apollo 11 safely landed on the moon, Neil Armstrong became the first human to walk on its surface, delivering his famous line as millions watched on television.

- A) Following Apollo 11's successful lunar landing, Neil Armstrong descended onto the moon's surface and addressed the global audience with a now-iconic phrase.
- B) Neil Armstrong made a public statement before setting foot on the moon, while the crew remained in orbit, which became famous and is still used until today.
- C) The moon landing was broadcast after the mission ended, and Armstrong's first steps were re-enacted for television including his famous line.
- D) After Apollo 11 landed on the moon, Neil Armstrong was one of the first astronauts to step on the moon and deliver a famous message to the audience watching on TV.

Question 11:

Although both Edison and Tesla contributed to the development of electrical systems, Tesla's innovations in alternating current proved more influential in the long term compared to Edison's direct current model.

- A) While Tesla and Edison share the credit for notable contributions to the advancement of electrical systems, it was Tesla's focus on alternating current that influenced more in the long term.
- B) Tesla and Edison both pioneered direct current systems, though Tesla's model was adopted more extensively during his lifetime.
- C) Compared to Tesla's theoretical ideas on alternating current, Edison's practical inventions in direct current had a greater effect on modern infrastructure.
- D) Both Edison and Tesla helped develop electrical systems, though only Tesla's innovations in alternating current were proven to be correct and therefore influenced more in the long term.

Question 12:

Compared to other political reforms of the early 20th century, the women's suffrage movement gained momentum more slowly, but eventually achieved one of the most transformative victories in democratic history.

- A) The woman's suffrage campaign eventually became one of the most revolutionizing victories in democratic history although it progressed at a slower pace than other reforms of its era.
- B) Early 20th-century reforms like labor rights and education access were more effective than the women's suffrage movement, which gained little traction until late in the century.
- C) Compared to other political reforms in the 20th century, the women's rights movement progressed slowly and only achieved victory towards the end of the century.
- D) Compared to women's rights, reforms in industrial safety and trade policy were implemented more gradually and with more long-term influence.
